
Joseph L. Goldstein, M.D.

Dr. Joseph L. Goldstein is currently Chairman of the Department of Molecular Genetics and Paul J. Thomas Professor of Medicine and Genetics at the University of Texas Southwestern Medical Center at Dallas. In 1985, he was also named Regental Professor of the University of Texas.

Dr. Goldstein obtained his bachelor of science degree from Washington and Lee University and his medical degree from the University of Texas Southwestern Medical Center. After completing his internship and residency in internal medicine at Massachusetts General Hospital, he spent two years as a Clinical Associate at the National Institutes of Health and two years as a fellow at the University of Washington School of Medicine. In 1972, he returned as a faculty member to the University of Texas Southwestern Medical Center where he began his ongoing collaboration with Dr. Michael S. Brown. Together with Dr. Brown, Dr. Goldstein has made numerous seminal discoveries in the regulation of cholesterol metabolism. Their work has been recognized by many awards, including the Albert D. Lasker Award in Basic Medical Research in 1985, the Nobel Prize in Physiology or Medicine in 1985, and the National Medal of Science in 1988.

Dr. Goldstein has served as a member of the editorial boards of *Cell*, *Annual Review of Genetics*, *Journal of Biological Chemistry*, *Arteriosclerosis*, *Science*, and the *Proceedings of the National Academy of Science*. He is a past president of the American Society for Clinical Investigation and was a member of the Governing Council of the U.S. National Academy of Sciences. He has also served on the NIH Program Advisory Committee on the Human Genome and as a Non-Resident Fellow of the Salk Institute. Dr. Goldstein is currently Chairman of the Medical Advisory Board of the Howard Hughes Medical Institute, Chairman of the Albert Lasker Medical Research Awards Jury, and a member of the Board of Trustees of the Rockefeller University. He is a member of the Scientific Advisory Boards of the Welch Foundation, Memorial-Sloan Kettering Medical Center, and The Scripps Research Institute.
